PROFILE

I love the web development environment but unfortunately I have no experience in the workplace but I am still looking to grow and be constantly learning. I am not an expert but I know how to function effectively, it is something that I like to do and therefore motivates me to continue learning. I consider myself a responsible, proactive and committed person, but above all with a lot of desire to work, gain experience and grow professionally and personally.

SKILLS

- HTML
- Css (Sass)
- Python(in progress)
- Testing QA
- MySQL
- Git
